

National Conference on E-commerce, Cybersecurity and Digital Forensics (2013)

Lusaka, Zambia | 26–27 August, 2013 | Venue: Intercontinental Hotel

event management & training

excellence is attention to detail

in partnership with

Cybercrime is an ever-growing problem that poses new challenges in the detection, prevention, investigation and prosecution of criminal activities. Combating cybercrime is a difficult task which requires co-operation between many stakeholders, and fundamental changes in law, social attitudes and practices. Computer and network security are often key factors that determine the likelihood of cybercrime, while digital forensics focusses on the detection, evidence gathering and prosecution of offenders. This conference is an excellent platform for individuals, organisations and departments to learn how to tackle Cyber threats by understanding the relevant legal framework and learning from case selected studies. The conference will appeal to computer security experts, legal professionals, academia, law enforcement agencies and the general public.
